

Midway

Midway City Parks Department

Dear Midway City Residents,

Midway City has purchased new playground equipment to enhance your children's visits to our city parks.

Hamlet Park is currently under construction for a new slide structure, climbing net spinner and track slider. The slide structure has not passed inspection or met the safety requirements guidelines to date.

The City has closed and fenced off the area of the slide structure for the safety of you and your children. We are currently working with the vendor and installer to complete the installation of the playground equipment in accordance with industry safety standards to ensure that the structure is safe and can be used for many years of playing fun.

The other new equipment at Hamlet Park has passed inspection and can be used with no concerns.

For your information:

Hamlet Park playground is rated for 5 to 12 year-old children.

Centennial Park playground is rated for 2 to 5 year-old children.

Michie Park playground is rated for 5 to 12 year-old children.

Burgi Hill Park playground is rated for 2 to 12 year-old children.

We appreciate and thank you for your patience while we diligently work through these issues with the installers. Please do not let your children play in the closed playground area at Hamlet Park. As always, your children's safety is our top priority.
